Subject: Information re: Revisions to CVP and SWP Export Plans beginning 12/10/99

This is an informational message to all those who received the previous updates regarding the planned CVP and SWP Delta operations plans. There has been a late change in the operations plans regarding the export reductions to be implemented by CVP and SWP beginning 12/10/99:

- 1) CVP will cut to one pump at about 0700 hrs. This will result in about 750 cfs export after that time.
- 2) Beginning 12/10 SWP will divert about 3300 cfs at Clifton Court.
- 3) Total Exports (after 0700 hrs 12/10/99) will be about 4050 cfs.
- 4) No change in Delta Cross Channel Gates, they will remain closed through the weekend.
