

Memorandum

Date : July 25, 1995

To : Lester Snow

From : Steve Yaeger, Deputy Executive Director
CALFED Bay-Delta Program

Subject: DWR Interagency Team

The team that we need to involve from DWR includes the following Divisions and individuals:

- Executive Kathy Kelly*
- Planning Kathlin Johnson**
Stein Buer* - North Delta
Mike Ford - South Delta
George Barnes - Modeling
Curt Schmutte - West Delta Levees
- DLA Dave Lawson - Levees
Rick Woodard - Water Quality
- Environmental Services Randy Brown* **
Bellory Fong
- Design & Construction Facilities Design Team
- Operations Jim Spence**
- The Reclamation Board Rod Mayer - Project Levees

Some of these individuals (marked by *) already serve on our Program Coordination Team. The others have special expertise that we need to call on for our Ad Hoc issue teams. Others, (marked by **) will have to review and recommend to Bob Potter on our workproducts on an informal basis, (DWR does not use a formal review process but reacts to requests from Bob).

The key to getting access to these individuals is to get Bob to relay a sense of high priority to the Division Chiefs. Once that is in place we can communicate our specific needs to the Division Chiefs or, with their blessing, directly to the individuals.

It would help our process if Bob would give Kathy Kelly the responsibility of serving as the focal point.
