 From: Dick Daniel
 CALFED Bay-Delta Program
 Subject: Review of Draft Material for the ERPP

Attached for your review and comment are drafts of the Sacramento River Ecological Zone Vision Statement and its technical appendix. Also, we have included vision statements for chinook salmon, steelhead, sand hill cranes, black rail, contaminants and harvest.

At the PCT meeting we want to discuss content, format and policy associated with these drafts. Please pay particular attention to the Sacramento River Vision. We will want to know if you think it is complete and understandable, and if the targets, implementation objectives and programmatic actions are appropriate.

Please note that the Sacramento River Technical Appendix contains some strike-out material. These are implementation objectives which I believe are outside the problem scope of the Program. We need to discuss this issue.
