

<b>Alternative Narrowing Process</b> Multiple Intakes Conveyance Option <b>Alternative 2C</b>	
<b>3 Intakes (Alt 2C)</b>	<b>4 Intakes (Alt 3I)</b>
Intakes in western, central, and southern Delta, I.F.s to CCFB	Extend central I.F. to Sacramento River at Hood. Siphon under San Joaquin
Move screens to intakes to reduce predation	Screen all intakes
Still draws Sacramento River water across Delta	Option to fully screen Sacramento River water
Flexibility limited to central and south Delta	Offers flexibility to adjust diversions north and south Delta
No new storage	Storage flexibility to manage diversions
Conveyance Capital cost: \$2,281	
<b>Recommendation:</b> Carry the concept and system flexibility forward into alternative 3I and drop alternative 2C from consideration.
