Subject: Westlands Water Deliveries

Jeff—

Following is an "in progress" table regarding Westlands water deliveries. You'll notice a host of blank cells and even conflicting values (i.e., for supplemental water totals and BOR vs. Westlands information) – that's where I especially need the BOR's help.

This information is of crucial importance to the entire B2 toolbox effort and needs to be compiled as soon as possible. If it would be useful for me to come to Sacramento and work with BOR staff to facilitate an expeditious assemblage of information, I am very willing to do so. Please let me know.

I still need more specific information regarding Westlands WD deliveries (for both CVP contract and CVP supplemental water deliveries) including delivery data:

- **By year** (including historic deliveries dating back to contract origination)
- **By month** (or some means to compare BOR Oct-Sep. data with Westlands March-Feb data)
- **By contract type**

It would additionally be useful to understand the relationship between the 495A and 106E contracts (i.e., what are the terms under which these deliveries are available, what is considered "firm"). Who is the best contact for this information?

Thanks for your assistance, Jeff.

Katrina
