

## ***Implementation Strategy: Assurances***

---

- Stakeholders seek timely, meaningful involvement in implementation decision-making.
- No agreement on what form such involvement should take.

**W**

## ***Implementation Strategy: Assurances***

---

- Workgroup members want implementation tied to clearly articulated performance criteria.
- Performance criteria will vary by program component and may not be numeric targets.

**W**

## ***Implementation Strategy: Assurances***

---

- Assurances workgroup suggests a new entity to implement the Ecosystem Restoration Program.
- No agreement on the form such entity should take.

**W**

## ***Implementation Strategy: Assurances***

---

- Assurances workgroup wants implementation of ERPP to be coordinated with implementation of the remainder of the Program.

**W**

## ***Implementation Strategy: Assurances***

---

- Some members of the assurances workgroup fear that assurances for water users will come at the expense of the ecosystem.
- They seek assurances for the environment commensurate with assurances for users.

**W**

## ***Implementation Strategy: Assurances***

---

- Some members of the assurances workgroup express concerns that misoperation of an isolated conveyance facility can not be prevented.
- They also express concerns that an isolated facility will affect in-Delta Water Supply, Water Quality and long-term levee maintenance.
