

**APPENDIX J**

## Partnership Agreement

We, the members of the Central & Southern Florida Project Restudy Team, have been empowered by our agencies to expeditiously advance the restoration of the Everglades and the South Florida Ecosystem and to assure the prudent use of water resources. We pledge to make this effort our highest work priority and to set the needs of the team above individual goals.

We recognize the necessity and importance of completing our mission quickly and efficiently, making effective use of our collective agencies' resources to ensure the highest quality results.

We are committed to open communication, joint problem-solving, and team-work to accomplish the following goals:

- Maintain a positive partnership/team approach at all levels.
- Establish a general problem-solving process.
- Establish effective means of communication with and between partner agencies as well as others
- Facilitate interagency information exchange.

We, the project team members, do hereby commit ourselves to work together through mutual trust and respect and to cooperate in all matters which affect this project. For we believe that only through this spirit of teamwork, using the attached implementation plan for our partnership, can we successfully advance the restoration of the Everglades and South Florida Ecosystem.
