

**CALFED Bay Delta Program
Drinking Water Quality Program
Proposed Milestones**

- 10/5** Get background information on previously proposed actions and recommendations
Get background on source assessments and magnitudes of loads of drinking water constituents
Determine criteria to make decisions on actions
- 10/27** Get background information on problems previously identified
Using criteria developed for identifying problems, perform exercise identifying problems and impacts
- 11/17** Get background information on previously identified solutions
Using criteria developed, identify solutions and prioritize actions
Identify implementing agencies
Identify components of the implementation plan (which must include identification of an implementing agency and a finance plan)
- 12/8** Divide Work Group into Industrial, Agricultural, Treatment Technology, Urban Runoff Task
Groups to specify the scope of actions.
Assignments are made to develop an implementation plan (including a financial plan) to implement the actions.
- 1/5** Work Group interacts with the Delta Drinking Water Council
Implementation Plans are presented and recommendations to the Delta Drinking Water Council are made.
- January** Recommendations and plans are sent to Policy Group for decision. After a decision the implementing agency(s) enter into an agreement and are funded.
