

CALFED Bay Delta Program

November 4, 1999

The following suggested implementation options are presented to obtain the Drinking Water Constituents Work Group input to implement the tasks outlined in the Assessment of Sources and Magnitudes of Loads of Drinking Water Constituents of Concern Work Plan. These are suggested and in no order of priority. There may be legal constraints applied to any implementation option. Suggestions for additional options are welcomed.

1. Agency-agency or agency-stakeholder partnership
2. Independent consultant
3. CALFED lead (with additional temporary staff to organize the study tasks)
4. Federal or State CALFED agency lead (an agency involved in water quality monitoring)
5. CALFED lead (stakeholders organize the study tasks)
