

ITF NSA #16 - RD 17 (San Joaquin Sub-Basin #4)

Date Out For Review: 24-Apr-97
 Report Submitted By: USACE

AGENCY	DATE COMMENT RECEIVED	COMMENT RECEIVED
USACE	24-Apr-97	Repair versus setback levee are addressed in the draft PIR. Preliminary report cost of setback levee to be prohibitive. The recommended repairs do not preclude incorporation of nonstructural studies under Phase IV investigations.
FEMA	28-Apr-97	Appropriate action is to repair the levee. No alternatives to offer at this time.
EPA		
BOR		
FWS		
USGS		
BEM		
NRCS	29-Apr-1997	We have no specific easement proposals to substitute for the immediate repairs. However, the San Joaquin River is in need of a long term solution involving many reclamation districts and other entities. Our programs may be able to assist in carrying out a long term plan.
EDA		
NMFS		
CALFED		
DWR	1-May-97	Area has potential for set back levees as a NSA. More information is needed to determine if other non-structural alternatives would be appropriate.
