

**CALFED
BAY-DELTA
PROGRAM**

Radio Alert
Week of May 25

OPTIONS AIRED FOR BAY-DELTA FIX

The CALFED Bay-Delta Program, a collaborative effort among the state and federal governments and California's leading agricultural, urban and environmental interests has released three potential solutions to the environmental and water management problems of California's Bay Delta system. California's Bay-Delta system supplies drinking water for more than 22 million Californians and irrigation water for the state's \$24 billion agricultural industry. It supports more than 750 plant and animal species, some found nowhere else on earth. Years of conflict among urban, agricultural, environmental and other users have pushed the system to the brink of failure. Ultimately, California's trillion-dollar economy is at risk if a consensus solution to Bay-Delta problems is not reached.

NORTHERN CALIFORNIANS HAVE A PARTICULAR STAKE IN FINDING A BAY-DELTA SOLUTION, INCLUDING:

- ➔ What kind of assurances will there be about the ability to continue to meet the water needs of Northerners?
- ➔ How much will the solution cost and who will pay?

A public hearing will be held Thursday, May 28, at the Sonoma County Board of Supervisors Chambers in Santa Rosa to hear from local residents. The following individuals are available for interviews during the weeks prior to the hearing.

Richard Golb, Executive Director, Northern California Water Association

To arrange and interview, please call Jill Esterbrooks at (619) 688-0054.
