CALFED Bay-Delta Program

Subject: Toxics Briefing Paper Review Team Meeting

As you may be aware, we are currently in a transition period from the Bay Delta Oversight Council process to the CALFED Bay-Delta long-term solution finding process. As part of our efforts to complete activities initiated during the Bay-Delta Oversight Council process, we are requesting your review of the attached draft material on toxicity in the San Francisco Bay/Sacramento-San Joaquin Delta Estuary. Most of this material was transmitted, in rough draft, to you previously. This package includes some new material which is indicated by a line along the right margin. In addition, some minor revisions have been made to previous sections and the material has been reorganized to reflect the latest outline. Howard Bailey from the University of California Davis is preparing this material, under our supervision, to provide the most current and comprehensive information available. We request that you review this material to ensure it addresses your agency's concerns regarding toxicity in the Estuary. In addition, we are requesting your ideas on how this information can be utilized most effectively in the future process. Specifically, we would like input from your agency as to present or future studies you may be planning which would help complete the conclusions and recommendations sections of the paper (interrelating the knowledge of potential impacts of toxicants to the Estuary's organisms discussed in this report with potential impacts throughout the food chain).

We will be contacting you to schedule a review team meeting for the week of April 10, 1995 to discuss any questions/comments you may have regarding the toxicity paper. We will also ask for your input on how we should proceed with completion of this briefing paper. If you have any questions prior to the meeting, please call me at 657-2666 or contact Victor Pacheco at the same phone number.
