From: Rick Breitenbach *RB*

Subject: Comments on Workshop Packet on Establishing Objectives for Bay-Delta Solutions dated September 1, 1995 and Problem/Objective/ Causes/Actions Worksheet dated September 14, 1995. For Your Information - Packet Entitled "CALFED Bay-Delta Program, Establishing Objectives for Bay-Delta Solutions" dated September 14, 1995.

Several weeks ago, you received the September 1, 1995 Workshop Packet. There was a request for comments by September 15, 1995 within the introduction to that packet. As luck would have it, the comment period has been extended until September 22, 1995. So you have an extra week to get me your thoughts.

The Problems/Objectives/Causes/Actions Worksheet was handed out at yesterday's (September 14, 1995) workshop. As you will notice when reading the introductory comments, we would like to use the feedback on these worksheets in our October 12, 1995 workshop. Any thoughts or comments you might have on these should be sent (handwritten and fax is ok) to me by October 4, 1995.

The informational packet is the set of overheads used during the workshop. The pages from 14 through 18 lay out a simplification of the overall process which you may find useful.

Lastly, I would like to thank you for your attendance and participation in the workshops held to date. While the ones we have held were a bit dry and tedious the next ones will be a little more lively as we begin to bring together the building blocks for the alternatives. Also, we will have chocolate chip cookies for the attendees at the next workshop.
