Subject: Evaluations of Alternatives Against Solution Principles

Attached for the review of your EPA team working on CALFED issues is the initial sets of evaluations against the solution principles for alternatives A through D.

The remainder of the evaluations will be transmitted by tomorrow's overnight mail so that you have them to review on Thursday. I have also enclosed a copy of the operational concept plan for each alternative to assist you in your review and comment on the evaluation that the Program Team has completed for each alternative. In addition, I would like to get your comments on the rationale for each evaluation, which is shown in bold, as well as the potential revisions shown in the table on page 5 of each writeup.

I would appreciate receiving your comments by May 10 if at all possible so that we can compile them by the next PCT meeting.
