Subject: Draft Outline for CALFED and
Floodplain Management
Framework

COMMENTS:

Hello Framework team,

The following page is the preliminary outline for the integration framework between CALFED and floodplain management efforts in the Central Valley, San Joaquin and Cosumnes River regions. As outlined in a meeting with CEQ and OMB on July 17 and a conference call on July 21, floodplain management initiatives in the area, including short- and long-term planning, will now be more closely integrated with CALFED. This framework is intended to facilitate the integration, which will in turn, identify projects that are complementary to CALFED's projects and programmatic goals, and provide greater consistency and efficiency among the various agencies and programs.

Please review the draft and inform me of any gaps or key areas that need coverage. Because the deadline for completing the framework is AUGUST 1, feel free to start writing or filling out sections of the outline as you see fit. I know that some of you have already started working on portions or have been talking together about the framework. Once you are finished, please send me an electronic copy and I will attempt to integrate all of the information and turn it around for review. I will be in touch with each of you shortly, but please call if you have any questions.
