Public Comment

Bob says comments on the EIS/R are increasing steadily. We started to receive another postcard campaign this week of about 500-600 cards with more expected. Mike Myatt responded to public comments and completed the first draft of the Cost Allocation Strategy Report

Good news! We got the scanner up and running, so this week Heather has been scanning letters and drafting comment response. Angela Rainwater continued to assist with the task of comment letter database entry, since Trina is on vacation. Angela also assisted Debbie Giglio in preparing for the Art Meeting on Thursday morning.

The work continues of entering Administrative Records into the database, and Susan reports coding about eight hundred comments and hearing testimonies this week.

The Agency Revision Team

This week, ART discussed issues to be elevated for management and policy team. Next week they will discuss storage and conveyance and ecosystem restoration plan agency issues.
