

## **Organization and Review of Changes to the Impact Analysis Document and Program Plans**

Attached are the changes, as of December 3, 1999, that have been made to the following documents:

- Impact Analysis
- Ecosystem Restoration Program Plan
- Levee System Integrity Program Plan
- Water Quality Program Plan
- Water Use Efficiency Program Plan
- Water Transfer Program Plan
- Watershed Program Plan
- Multi-Species Conservation Strategy
- Comprehensive Monitoring Assessment and Research Program Report

### **Organization:**

For each document, changes are noted with strike-over for deletions and underlining for additions. The entire document was not reproduced, only those pages and/or sections where changes occurred are included in this package. Each change is identified with the section and page from the original documents. The intent was to provide sufficient text so that you will be able to understand the change in context of the section of the parent document. If you need to review a larger portion of the parent document to understand the change, sufficient information was provided for you to locate the exact area of the change. At the end of each changed section, the code or codes from the comment letters that resulted in the change are listed. If there is not a code, the change was generated internally, not from a public comment. All changes in the MSCS were made by members of the MSCS team, they were not made as a result of comments.

Volume 1 of the ERP was revised to include portions of the MSCS. Specifically, species goal prescriptions, MSCS conservation measures and some species classifications from the MSCS were included in Volume 1 of the ERP. The ERP portion of this review package is a sample of how the changes were accomplished. The entire ERP Volume 1 exceeds 600 pages and was not reproduced as all of information added to the ERP Vol.1 was previously published in MSCS.

Due to the rapid turnaround to release this draft, no editing has been performed. We apologize for any inconvenience this may cause.

### **Review and Comments:**

Please do not take the time to make editorial comments. We will have both internal reviews and professional editors complete this task prior to the documents being finalized for print. Please remember that this is the first of two agency administrative reviews. Your review should focus on the following listed items:

- technical errors or omissions
- inconsistencies between program plans or between the impact analysis and program plans
- unclear ideas/statements
- inaccurate information

When you identify one of these items, please offer specific advice on how to make improvements. Please identify the specific change you are commenting on by writing the title of the document and the specific information that identifies the section where the change occurs.

**Questions:**

If you have questions regarding the format of these documents or how to track a particular change back to the June 1999 parent document, please call Campbell Ingram at (916) 654-2733. Thank you in advance for your participation in this review.
