

July 1, 1999

Dear Governor Davis,

I am writing to ask you to chart a smarter course for California through the 'CALFED Bay/Delta' program and to help protect and use our water resources for the next 50 years. It is your responsibility as our governor now to insure this for future generations.

I can about our rivers, bays and drinking water, because I know from traveling around the world that fresh water is a scarce commodity. I also urge you to support programs that educate people to use as little water as possible on an individual basis. I think people in America believe water is plentiful and they can waste it as they please. While people in other parts of the world would rejoice for one clean cup of water, we in America take 20 minute hot showers. Please support educational programs.

The CALFED program invest in water efficiency, restores our rivers and fisheries, improves water quality. Please support it and I will support you!

With greatest respect,

Kim Marie Carlson

P.S. Don't respond to this letter. Save the paper and a tree.
