Dear Governor Davis

I am writing today because of my concern with the state of California's rivers, bays and drinking water and at last, I am now aware that something can be done to improve the future of our water. I urge you to chart a smarter course for California through the CALFED Bay/Delta program, the plan that shows us how to protect and use California's water resources for the next 50 years.

To invest in water efficiency for at least seven years before even considering new dams or reservoirs, restoring our rivers, bays and fisheries by providing adequate fresh water and caring for the land around our rivers, improving water quality for people and wildlife by enforcing pollution limits seems the only course to take.

I thank you for your attention in this matter.

Kind regards

Brian and Terah Collins
