Governor Gray Davis  
State Capitol  
Sacramento, CA 95814

Dear Governor Davis:

RE: CALFED Bay/Delta program

As a parent, grandparent and concerned citizen, I can be pessimistic about the future of the human species and of our planet. We must all work together to maintain a healthy planet and resources for all living things on it. Water is probably the most critical element in California's future.

We must invest in restoring our rivers, bays and fisheries by providing adequate fresh water and by caring for the lands around the rivers. We must enforce pollution limits to improve water quality for people, wildlife, and plants. We must invest in efficient use of water before considering new dams and reservoirs. It would be better to invest state monies to improve water quality, protect our watersheds and fisheries, and make our communities self-sufficient in water conservation than to flood valuable habitats and remove needed water from our rivers. The choice is a clear one.

Through the years, I have agreed with a number of your positions on government of this state. I am sure I can count on you once again for leadership in support of the CALFED Bay/Delta plan.

Sincerely,

*Doris L. Cutting*
