I am writing to request aid in protecting our rivers, bays and drinking water. This could be accomplished by charting a smarter course for California through the "CALFED Bay/Delta" program—a plan for how to protect and use California's water resources for the next 50 years. The program is designed to do the following:

- Invest in water efficiency
 - Restore our rivers, bays and fisheries by providing adequate fresh water and caring for land around bays
 - Improves water quality by enforcing pollution limits
- Stops making taxpayers pick up the tap

I care about protecting the environment because water is what we are all made of. If we misuse our resources we will jeopardize the well being of our and the future generations. We need clean water to stay alive. We need it for our families, farms, business and wildlife.

Please consider the above suggestions seriously.

Thank you,

Avani Patel
