Governor Gray Davis  
State Capitol  
Sacramento, CA 95814

Dear Governor Davis,

I am writing to you today in hopes that you will continue with your strong leadership and help California to preserve its rivers and clean water for our families, farms and wildlife. We need to invest in water efficiency now before building new dams that only destroy many acres of wildlife and recreational habitat. We need to restore our rivers and bays by protecting not only the water course but also the surrounding water shed and lands to continue providing fresh and clean water. We must also enforce pollution standards to prevent further degradation of water quality. Water is the most valuable resource we have, and it is critical to take all steps necessary to protect our water supply for all inhabitants of California, which includes our abundant wildlife. Please support the CALFED Bay/Delta program as I feel that this plan is a wise step in the right direction to help California protect it's water resources for future generations. Thank you.

Sincerely,

Leon J. Baginski, M.D.

Cc: Tom Hannigan
