Governor Gray Davis  
State Capitol  
Sacramento, CA 95814

Dear Governor Davis:

Please do what you can to implement the California FED Bay Delta program. This is a plan to protect and use California's water resources for the next 50 years.

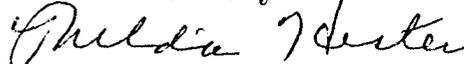

We should invest in water efficiency for at least seven years before considering dams or reservoirs.

This plan will restore our bays and fisheries by providing adequate fresh water and caring for the land around the rivers.

We can improve our water quality for people and wildlife by enforcing pollution limits.

I am an old woman of 82 years who grew up in the S.F. Bay Area. I can remember when the bay was much larger than it is now and the water was much clearer. We had striped bass and other fish that are not being caught now because their numbers have diminished so greatly.

Most sincerely

Milda Hester
