Re: Stockton East Water District/Calfed Bay-Delta Program  
Our File No. 1026-015

Dear Lester:

It was exciting to hear at the March 2, 1999 San Joaquin River Agreement meeting that CALFED was committing to taking a more active role with regard to water quality (salinity and dissolved oxygen) in the San Joaquin River. I wanted to let you know that Stockton East Water District and the City of Stockton would very much like to take an active role in the policy planning on those issues. If there is any way we can provide assistance or support, please let me know. I assume we will be notified of any future meetings, and will be able to review any documents generated by CALFED on these issues.

Thank you for your assistance to all the parties in working through this process.

Very Truly Yours,

Jeanne M. Zolezzi  
Attorney-at-Law
