

No	Page No	Para/ Line	Agency	Comment
8	7-55			add common programs to tables
9	8-1		CDFA	new title to better describe ag resources :Land Use, Social and Economic; additional information needed in ag section to better describe physical environment perspective, tone down economic analysis
10	8-16		CDFA	develop maps for three main regions for ag land use; cropping patterns, prime farmland resources
11	8-33; 8-39		CDFA	clearly state how these sign criteria will be used for second tier documents; incorporate tables with range of impacts (some direction provided from Steve)
12	8-1		BOR	conflicts between conclusions discussed under alts and common programs need to be addressed
13	8-15		BOR	delete 2 nd bullet in right column
14	8-25			focus should be acreage numbers rather than number of farms; move land use section from 8-26 to 8-25 after existing conditions heading
15	8-28	table		fix so it reflects ag numbers
16	8-29			social well being section doesn't relate well to ag
17	8-33			add water related issues to sign criteria; clarify sign criteria to be more specific

✓ 18	8-38			on insert: 3 rd from last bullet needs to be clarified - potential controversy
19	8-38		DFG	on insert; replace intro sentence on bottom block with "mitigation strategies for unavoidable..."; first bullet under last section - remove " and affordable"
? 20	8.2		USGS	subsidence is not addressed as an ag issue; should also be addressed in no action - lands taken out of production due to subsidence by 2020 (check); cross reference to ag as impact
? 21	7-79			copy first para under mitigation strategies into each section of doc
22				ag impacts need to be looked at with cumulative perspective
? 23	8-38			language for mitigation strategy: "The CALFED benefits of water supply and reliability should be provided to agricultural water users on an equitable basis considering the nature and extent of impacts to ag resources, including land and water."
24	8-43			shorten para top right column to better reflect relative importance of water transfers

No	Page No	Para/ Line	Agency	Comment
25	8-40; 8-42			question whether these tables should be removed given treatment of land use in section
26	8.3			disclose assumptions that went into analysis - pathway to conclusions (text from Hill); replace tables with those provided
27	8-60	2 nd col, center para	WAPA	inconsistent with info contained in summary box; need to state qualitative nature of available information and how this impacts the analysis - identify the unknowns as well
28	8-56	tables		revisit, revise and add beneficial impacts to all tables
29				determine where commercial fisheries should be discussed - sidebar, separate section, within an existing section
30	8-148			check text and table for reservoir recreation; combine tables and add benefits
31	8-205	4 th para	USFWS	balance the treatment of some benefits of levee veg, etc.; cross reference to veg section
32	6-11			numbers of sign figures are not justified - misleading (add qualifier explaining use of or specify number that makes sense)

No	Page No	Para/ Line	Agency	Comment
33	8-187			adjust first sentence under reservoir section to characterize flood control as incidental to function(don't infer that it is primary function)
34	6-10		USGS	numbers on figures don't add up - need to define why (should have mass balance); check justification for use of all numbers on both figures and tables(see comments provided)
35	6-48	7 th para		check second statement re crops grown after land drained
36	6-44	2 nd para, right col		first statement makes no sense - ck entire paragraph and adjust
37	6-58	3 rd para		rewrite - see comments from Frank
38	8-48	insert		delete 5 th bullet from bottom or reword by ending sentence at 'problem', deleting the rest
39	6-52	table		check source for data (date of analysis)
40	6-2			conjunctive use issue and relationship to subsidence - review what is included; add discussion of monitoring, (also should be discussed from adaptive management perspective)
