

Sergio:

Concise and to the point about the issues.

The diagram on page 5 showing the various levee standards is quite good. Is it available as a single .pdf or object file and could I get an electronic copy? It would be very useful in my efforts to increase infrastructure owners contributions to Reclamation Districts for levee improvements eligible for Subventions funding. If we can increase the funding available for local matching we could get a lot more work done than is going on at present.
