CalFed Bay-Delta Program
1416 Ninth Street, Suite 1155
Sacramento, CA 95814

Attention: Rick Breitenbach

Dear Mr. Breitenbach:

Enclosed is a certified copy of City of Larkspur Resolution No. 23/99 that was adopted by the City Council at their meeting last evening. This resolution supports the ecological well being of the San Francisco Bay/Delta estuary and includes essential elements that must be incorporated in policies and programs to be undertaken by the CalFed process.

Sincerely,

Jean A. Bonander
City Manager

cc: Association of Bay Area Governments
Bay Conservation and Development Commission

CITY OF LARKSPUR

RESOLUTION NO. 23/99

SUPPORTING THE ECOLOGICAL WELL BEING OF THE
SAN FRANCISCO BAY/DELTA ESTUARY THROUGH THE CALFED PROCESS

- WHEREAS, the health of the San Francisco Bay/Delta estuary and the diverse ecosystems it supports are fundamental to the environmental well being of the entire Bay Area; and
- WHEREAS, much of the Bay Area's economic vitality is supported by the Bay/Delta estuary, including industries such as tourism, recreational and commercial fishing; and
- WHEREAS, the Bay/Delta estuary's health is in rapid decline, manifested by various indicators including dramatic reductions in fish populations, and due to a variety of devastating impacts, including the diversion of over 50 percent of its flows from the watershed's rivers, the loss of over 85 percent of historic wetlands, and the discharge of 40,000 tons of pollutants into the Bay; and
- WHEREAS, since 1994 the Federal Government and the State of California, in conjunction with agricultural, urban and environmental stakeholders, have undertaken an effort to address the remarkably complex water resource issues of the Bay/Delta ecosystem through a process known as CalFed; and
- WHEREAS, in the CalFed process the current public comment period for the Draft Programmatic EIR/EIS provides a critical opportunity for input on the issues affecting the San Francisco Bay/Delta estuary;

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Larkspur hereby identifies that the following essential elements must be incorporated into future policies and programs undertaken by the CalFed process:

- * A guarantee that there will be adequate freshwater flows into the Bay - The San Francisco/Delta estuary's historic freshwater flows have been reduced by half. Currently there exists a need for science-based standards that establish minimum flows of freshwater into the Bay. Adequate flows will benefit the entire estuary in diverse ways, including improving water quality, supporting biological diversity, and the health of all of the Bay/Delta estuary's ecosystems.
- * Water conservation by all users - Equitable water conservation practices must be required and enforced for all users throughout California. Managing demand through conservation practices and greater water use efficiency can eliminate or substantially reduce the need to construct new storage facilities. Until conservation practices and demand management have been implemented and monitored, the construction of new storage facilities should not be initiated.
- * A fair share of funding for Bay Area environmental restoration efforts - The EPA's Comprehensive Conservation and Management Plan (CCMP), BCDC's San Francisco Bay Plan, and the RWQCB's Bay Basin Plan all establish numerous beneficial measures that must be taken to protect and restore habitat and improve fish and wildlife in the Bay/Delta estuary. Of the most recent State funding package, only 5% came to projects in the region. Funding to implement these recommended programs must be brought up to levels that are appropriately proportional to budgets for environmental restoration in other parts of the State.
