

Disclaimer: This guide is intended to provide accurate and current information on federal and California regulations most pertinent to projects implementing CALFED's long-term plan. The discussions of regulations are necessarily general and do not cover all exceptions and variations to general rules. In some cases, common language is used rather than precise legal language to improve understandability. This publication should not be relied on for legal guidance; consultation with legal counsel may be required to address specific regulatory situations. Ultimate authorities on environmental compliance issues are the regulatory agencies and not the information provided in this guide.

TABLE OF CONTENTS FOR VOLUME 1: GENERAL GUIDANCE
