

Cover note to EWA review

10 October 2004

Members of the EWA review panel,

I apologize for not having prepared an abstract or executive summary for this report yet. I am aware that you only have a limited time to prepare for the EWA review. Much of the material in the early part of the report is review material that you already know. The report is relatively short but if time is short I would suggest that you read the Introduction and then skip to the section "Criteria for Success..." and then read to the end. Several early reviewers believe that Table 8 will be of particular interest to you. I would appreciate any comments you would care to offer on the report. I will probably revise it at least once more before submitting it to the Science Program as "final".
